## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 11<sup>th</sup> 2006 has been entered and made of record.

### ***Response to Amendment***

2. Applicant's amendment filed September 11<sup>th</sup> 2006 has been entered and made of record.

3. Applicant has amended claims 1-4, 6-8, 10-11, 14-18, 20-22, 24-25 and 28. Claims 9 and 23 have been cancelled. Claims 1-8, 10-22 and 24-28 remain pending.

4. Applicant's remarks in view of the newly presented amendments have been fully considered and are found to be persuasive. Applicant's amendments clarify the issues previously recited in the objections. The newly amended claims are also found to distinguish over the prior art. The claims are now found to be in condition for allowance. Reasons for allowance are given below.

***Allowable Subject Matter***

5. Claims 1-8, 10-22 and 24-28 are allowed.

The following is an examiner's statement of reasons for allowance: With regard to independent claims 1, 14, 15 and 28, the newly presented amendments have been found to distinguish over the prior art in view of Applicant's remarks. The combination of Maruyama and Barros is still considered to be motivated and obvious combination, however the features now recited in the claim in step (i) wherein the details of the two databases are laid out is found to be distinguishable from the prior art combination. In particular the claimed step now claims that the two databases are coordinated and that the geographical feature information is separate and distinct from the spatial database dedicated to storing vector information. As now recited, the claim is found to distinguish over the cited prior art of Barros as combined with Maruyama. No other found prior art of record has been found to teach or fairly suggest the two distinct vector representation databases as now specifically recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
